**PURPOSE**

*(The following is for information purposes only and is not part of the certificate.)*

This equivalency certificate authorizes the certificate holder to handle, offer for transport or transport the dangerous goods UN1013, CARBON DIOXIDE, class 2.2 as a limited quantity in accordance with section 1.17 of the *TDG Regulations* for surface transport only (Road, Rail and Marine).

In December 2022, the UN Sub Committee of Experts on the Transportation of Dangerous Goods agreed to increase the limited quantity index for Carbon Dioxide from 0.120 ml to 1000 ml (1 L) in the *UN Recommendations*. This increase will eventually be reflected in the new Special Provision 406 of the *UN Recommendations* and it will eventually be adopted in the *TDG Regulations*. This equivalency certificate is based on the proposed Special Provision 406 of the *UN Recommendations*, shown below.

**Special Provision 406:** *This entry may be transported in accordance with the limited quantity provisions of Chapter 3.4 when transported in pressure receptacles containing not more than 1 000 ml. The pressure receptacles shall meet the requirements of packing instruction P200 of 4.1.4.1 and have a test pressure capacity product not exceeding 15.2 MPa·l (152 bar·l). The pressure receptacles shall not be packed together with other dangerous goods.”*

This equivalency certificate also authorizes a reduced size limited quantity marking when a carrier-specific tracking label is used.
